The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

Claims 1,2 and 9 are rejected under 35 U.S.C. 102(b) as being anticipated by DE 29609267U1, MAY 23, 1996

Regarding claim 1

DE 29609267U1, MAY 23, 1996 discloses a headlamp with pressure-tight encapsulation housing for regulating in response to pressure in the light using a microprocessor.

Regarding claim 2. according to claim 1,

thereby controller controls depending on the deviation from intended value or rate of change of pressure

DE 29609267U1, MAY 23, 1996 discloses providing specific output signals in response to different operating conditions.

Regarding claim 9,

Process for operation of headlight of claims 1 and 2

Claim 9 is anticipated by DE 29609267U1, MAY 23, 1996 for the same reasons stated in the rejection of the article claims 1 and 2 because the article limitations are found in the limitations of the process claim. For example claim 1, "controls the headlight based on the pressure within the housing" claim 9, "control of the headlight occurs depending upon the pressure within the housing".
